5	I think the number of warm water pools will increase in the future. Swimming is good for staying healthy, so many people want to use the pool when it is cold outside. I have two questions. Can high school students use the sports center? What is its name?
6	Yes, I think taking notes on smartphones is a good idea. I have two reasons. First, it makes information easy to use. People can quickly edit, search, and review their notes. Second, taking notes on smartphones can reduce paper use. Notebooks do not need to be used, so the amount of paper used in daily life is decreased.
