4	Social media has become a popular way for young people to communicate with others. It helps them feel connected to others and learn new things. However, they have to understand that it can damage their mental health by comparing themselves to others or might be involved in dangerous situations by sharing personal information.
5	I think this is a good idea. First, people can practice foreign languages efficiently. With AI, they can start their lessons anytime and anywhere because there is no need to make appointments or find places to meet with teachers. Second, people can feel relaxed and practice without hesitation. They would not feel uncomfortable or embarrassed even if they make mistakes because they know they are interacting with AI, not with a real person. Therefore, I think it is a good idea to practice foreign languages with AI.
